Total Light Customization

Full Color Smart Light Strips are capable of displaying millions of vibrant colors and tunable white light from calm 2000K to vibrant 7000K. Users have the ability to customize their lighting through the Cync app, setting color, intensity, scenes and schedules.

Simple Set Up with Google Home

Full Color Smart Light Strips connect directly to Google Home devices via Bluetooth with no additional hub or bridge and can be programmed for voice and out-of-home control.

Alexa and HomeKit Compatibility

Users can enable voice control with Amazon Alexa and Apple HomeKit by pairing the Full Color Smart Light Strips with the Cync Smart Plugs or C-Reach Smart Bridge (sold separately).

Control Individually or as a Group

Groups with Cync dimmers and switches to provide one-touch control of lights on different circuits.

Customizable Length

The Smart Strips can be cut for smaller areas or 40in Full Color Extension Strips are available (sold separately) to lengthen the Smart Light Strips up to 32 feet.
