## Total Light Customization

Cync Tunable White Smart Bulbs are capable of displaying white light from calm 2000K to vibrant 7000K. Users have the ability to customize their lighting through the Cync app, setting color temperature, intensity, scenes and schedules.

## Simple Set Up with Google Home

Tunable White Smart Bulbs connect directly to Google Home devices via Bluetooth with no additional hub or bridge and can be programmed for voice and out-of-home control.

## Alexa Compatibility

Users can enable voice control with Amazon Alexa by pairing the Tunable White Smart Bulbs with the Cync Smart Plugs or C-Reach Smart Bridge (sold separately).

## Control Individually or as a Group

Paired with the Cync app, these bulbs can be customized and controlled as a single bulb or can be grouped with other bulbs or Cync products.
