

IMPORTANT!

Artison RCC MK2 Series Subwoofers are designed to be powered by the RCC1000-SA Subwoofer Amplifier. The RCC1000-SA utilizes preset DSP equalization for flat frequency response when used with the RCC MK2 Series, and can power up to 8 (4 pairs) of the smaller RCC160-MK2-PC, or up to 4 of the larger RCC320-MK2-PC/R Subwoofers for a truly distributed bass system.

During system configuration, DO NOT mix RCC MK2 Series and legacy RCC Series Subwoofers on the same parallel output of the RCC1000-SA Amplifier. Doing so may cause undesirable behavior, due to the different types of DSP equalization used by the amplifier for these product lines.

Refer to the table below to confirm the exact products within each series of subwoofer:

RCC MK2 Series	Legacy RCC Series
- RCC320-MK2-PC	- RCC320-PC
- RCC320-MK2-R	- RCC320-R
- RCC160-MK2-PC	- RCC640-PC
	- RCC640-R
