3. Resolved Issues

The following issues are resolved in this release.

3rd Party Battery

- Resolved an issue in the Savant app where SolArk load consumption stopped reporting after returning to grid power following a power outage (ENGY-8055).
- Resolved an issue where communication with Tesla Powerwall 2 could be lost, causing energy data for Grid, Solar, and Battery to stop updating until the Director was rebooted (ENGY-8121).

Savant Power Director

- Resolved an issue where, after grid power was restored, some circuits controlled by the Essentials scene remained off instead of returning to the normal state (ENGY-7949).
- Enhancements were made to Host processes related to Savant Current Track Modules (ENGY-8129).

Savant Power & Light App

- Resolved an issue where, in Excess Solar to Grid Energy Mode, the Savant app incorrectly displayed solar exports as load consumption (ENGY-8124).
